Fertilizer Research **36:** 273–275, 1993.

CONTENTS Volume 36 1993

Volume 36 No. 1

Modelling of N-movements on catchment scale – a tool for analysis and decision making. I. Model description 1
M. Styczen, B. Storm

Tissue analysis technology for nitrogen fertilization of potato grown under subtropics short day conditions 19
J.P. Singh

Comparison of efficiency of Mussoorie partially acidulated phosphate rock and single superphosphate in a shallow Alfisol of the Indian semiarid tropics 29
D.P. Verma, S.H. Chien, C.B. Christianson, G. Pardhasardhi

Interaction of urea with triple superphosphate in a simulated fertilizer band 35
M.X. Fan, A.F. MacKenzie

Estimating 'effective' levels of phosphorus applied as superphosphate and rock phosphate 45
M.D.A. Bolland

Addition of gel-forming hydrophillic polymers to nitrogen fertilizer solutions 55
R.L. Mikkelsen, A.D. Behel Jr., H.M. Williams

Response of dryland wheat to fertilizer nitrogen in relation to stored water, rainfall and residual farm yard manure 63
D.K. Benbi, R. Singh, G. Singh, K.S. Sandhu, R. Singh, S. Saggar

Effect of excess boron fertilization on status and availability of boron in calcareous soils 71
W.A. Al-Mustafa, A.M. Falatah, A.A. El-Shall

Soil nutrient depletion by agricultural production in Southern Mali 79
F. van der Pol, B. Traore

Nitrate fertilization stimulates emergence of red raspberry (*Rubus idaeus* L.) under forest canopy 91
R. Jobidon

Volume 36 No. 2

Fertilizers and eutrophication in southwestern Australia
Guest editors: E.P. Hodgkin and J.S. Yeates

Preface iii
N.J. Barrow

Fertilizers and eutrophication in southwestern Australia: Setting the scene 95
E.P. Hodgkin, B.H. Hamilton

Eutrophic waters of southwestern Australia 105
A.J. McComb, J.A. Davis

Phosphorus retention and release from sandy soils of the Peel–Harvey catchment 115
G.S.P. Ritchie, D.M. Weaver

Soils and fertilizer use in southwestern Australia 123
J.S. Yeates

Hydrology of the Peel–Harvey estuary catchment 127
J.K. Ruprecht, P.R. George

Changing fertilizer practices 135
J.S. Yeates

Developing alternatives to phosphate fertilizers of high water solubility 141
J.S. Yeates, M.F. Clarke

Modifying sandy soils with the fine residue from bauxite refining to retain phosphorus and increase plant yield 151
S.C. Ward, R.N. Summers

The potential use of wetlands to reduce phosphorus export from agricultural catchments 157
J.M. Chambers, T.J. Wrigley, A.J. McComb

Managing nutrient losses from rural point sources and urban environments 165
D.M. Weaver

Managing the aquatic environment 171
R.P. Atkins, D.M. Deeley, K.W. McAlpine

Changing farm practice to meet environmental objectives of nutrient loss to Oyster Harbour 177
D.M. Weaver, A.L. Prout

The Peel–Harvey catchment management programme 185
P.R. George, K. Bradby

Volume 36 No. 3

Marketplace accepts purified wet-process phosphoric acid 193
R.A. Hutchins

Single superphosphae – reactive phosphate rock mixtures. 3. The use of concentration ratios of elements to identify the nature and amounts of unacidulated rock residues in the mixtures 203
P. Loganathan, M.J. Hedley

Effects of coralline lime on nutrient uptake and yield of field-grown sweet corn and peanuts in Oxidic soils of Western Samoa 211
A.W. Bekker, R.G. Chase, N.V. Hue

Yield response of wetland rice to band placement of urea solution in various soils in the tropics 221
H.F. Schnier, S.K. De Datta, A.M. Fagi, M. Eaqub, F. Ahmed, R. Tejasarwana and A. Mazid

Agronomy, modelling and economics of reactive phosphate rocks as slow-release phosphate fertilizers for grasslands 229
A.G. Sinclair, P.D. Johnstone, L.C. Smith, M.B. O'Connor, L. Nguyen

Chemical interactions between soil N and alkaline-hydrolysing N fertilizers 239
S. Sen, P.M. Chalk

Ammonia sorption by peat and N fractionation in some peat-ammonia systems 249
C. Abbès, L.E. Parent, A. Karam

Assessing phosphorus bioavailability in agricultural soils and runoff 259
A.N. Sharpley
